

1. Go to **bapl.org**
2. Select “log in to your account”

3. This will take you to the screen where you have to enter the long barcode on the back of your library card. The default PIN is the last four digits of your phone number. If you check the box that says “stay logged in” you will not have to enter your info again as long as you always use this same computer/device & browser. Note: Do not do check “stay logged in” on a library computer or other shared computer. This is just for your home computer or device.

- After you check the “stay logged in” box and hit “log in,” your browser will ask you if you would like to save the login. If you choose “Save” it will remember both the username (your barcode) and the PIN.

- If you plan to check your account on more than one device/computer, you can change your username to something easy to remember so you do not have to enter the entire 14-digit barcode every time.
- To change your username from your 14-digit barcode to something easier to remember, log in as usual then go into the **Account Preferences** tab.

7. From there, choose **change** on the **username** line.
